## Key Gaps Identified

**Gap:** Differentiators partially captured

**Fix:** Strengthen differentiator messaging with concrete proof points and case studies

**Outcome:** AI will more confidently recommend you over alternatives

**Gap:** Target audience not mentioned

**Fix:** Create an explicit 'Who We Serve' section listing specific industries and company profiles

**Outcome:** AI will correctly identify and recommend you to your ideal customer segments

**Gap:** Core offering not well captured

**Fix:** Add clear, AI-extractable value proposition statements to your homepage hero section

**Outcome:** AI platforms will accurately describe what you do in response to user queries

**Gap:** Key products/features not mentioned

**Fix:** Implement FAQ schema markup and dedicated product pages with detailed descriptions

**Outcome:** AI will surface your specific capabilities when users search for solutions

**Gap:** AI has limited knowledge of this company

**Fix:** Increase brand presence on authoritative sources (Wikipedia, industry publications, G2)

**Outcome:** AI platforms will recognize and accurately represent your brand

## Next Steps

1. Strengthen homepage messaging with clear, AI-extractable value proposition statements
2. Add explicit 'Who We Serve' section with specific industries and company profiles
3. Create dedicated 'Why Us' or comparison pages highlighting unique capabilities
4. Implement FAQ schema markup with detailed product/service descriptions
5. Improve Core Web Vitals — AI crawlers favor fast-loading pages
6. Add llms.txt file to guide AI crawlers to priority content

**Want help improving your AI brand representation?**

VAN helps companies optimize their digital presence for the AI era.
